troubleshooting

[Oracle AppWizard for Microsoft Visual C++ startup problems, 2-4](#)

tutorial lesson 1

[building and running the application, 4-14](#)
[building join clauses between tables, 4-8](#)
[connecting to the database, 4-5](#)
[creating the starter application, 4-4](#)
[exploring generated classes and files, 4-12](#)
[naming the form type, 4-6](#)
[selecting detail tables and columns, 4-8](#)
[selecting master tables and columns, 4-7](#)
[specifying the application type and user language, 4-9](#)

[starting Oracle AppWizard for Microsoft Visual C++, 4-4](#)

[viewing the projectReadMe.txt file, 4-13](#)

tutorial lesson 2

[adding customer information to a purchase order, 4-16, 4-24](#)

[adding member functions and implementation details to the COrderDynasetCustomer class, 4-20](#)

[adding member variables to the COrderDynasetCustomer class, 4-19](#)

[creating a dynaset class for the customer table, 4-16](#)

[displaying customer information for a purchase order, 4-25](#)

[file location, 4-16](#)

tutorial lesson 3

[adding the selected products to the purchase order, 4-30](#)

[displaying a list of items from the PRODUCT table, 4-29](#)

[enabling users to add products to a purchase order, 4-29](#)

[file location, 4-29](#)

tutorial lesson 4

[adding Implementation details to the event handler function, 4-35](#)

[allowing the detail table control to handle events, 4-34](#)

[enabling users to update a purchase order, 4-34](#)

[file location, 4-34](#)

tutorial lesson 5

[creating "New Order", Commit Order", and "Cancel Order" buttons, 4-41](#)

[creating a customer list dialog box, 4-37](#)

[creating a new class to handle events for the customer dialog box, 4-38](#)

[enabling users to add a new purchase order, 4-41](#)

[enabling users to add, commit, or cancel a new purchase order, 4-37](#)

[enabling users to cancel a new purchase order, 4-44](#)

[enabling users to commit a new purchase order, 4-43](#)
